WASHINGTON, D. C., July 22, 1901.

The bitter attack made on Admiral Schiey by E. S. Maclay seems likely to bring the entire subject of the battle of Santiago to a crisis, especially since it has been shown that Maclay is a "laborer" doing clerk's work in the Navy Department, and is thus vilifying his superior officer. He is also a bosom friend of Admiral Crowninshield, one of Schley's bitterest ene-mies, who is believed to have been the real author of nearly all the outrageous insults hurled by Maclay at the head of the conqueror of Santiago. Moreover, Maclay asserts that the proofs of the book were submitted both to Secretary Long and to Admiral Sampson and were returned by them, not only with approval but with commendation. Secretary Long denies this, saying only one chapter was submitted to him, and that this contained no reference to Schley. The book, it may be mentioned, calls Schley a coward, a catiff and a liar in so many words. This book was expected to be used, as the other two volumes of the work are used, as a text book at Annapolis, but Secretary Long says it must be expurgated first. In one sense the publication of the volume is not to be deplored. It has aroused Admiral Schley's friends to the determination to end, if possible, the conspiracy against him organized by a certain clique of naval officers. Representative Schirm's announced purpose of introducing a resolution in Congress asking for an investigation of the entire West Indian campaign, which ended in the capture of Cervera's fleet, is but a part of the there are tired of defeat, and the drift programme. Admiral Schley has a large number of friends in Congress who propose that justice shall be done him in that body, especially as it seems impossible to secure for him even fair treatment from jealous naval officers. Further, it is possible that Schley will bring suit against Maclay for criminal libel. This would throw the whole question into the courts, where Schley would receive an impartial hearing, and where the questions asked by his counsel would have to be answered. Schley will not, of course, ask an inquiry at the hands of the department, as the detail for the board would be made by Admiral Crowninshield, his bitter enemy. Before such al board

Ambassador Pauncefote has been incanal and will be acceptable to both nations. If so, it will undoubtedly provide for the right of defense of the canal by the United States in time of treaty to which the Senate will agree. The other amendments made in the Senate to the treaty may also be insisted upon, but this is uncertain. the whole subject is really regarded in Great Britain is shown by the cabled extracts from editorials in the London papers in regard to Lord Pauncefote's assumed that the United States insists as a matter of fact, fortifications were expressly barred by the treaty as adopted by the Senate. If this inference is correct, it is certainly an usurpation of power for the Postmaster General to take advantage of a technicality to make them on his own responsibility. Summed up, the new orders bar from the mails at the pound rate paper backed novels and similar publications; deprive of the pound rates newspapers and periodicals which have no bona fide subscription lists, but which are merely thrown into the purchaser of some more or less attractive premium, and prescribe that unsold copies of newspapers cannot be returned at the pound rate, either to the publishers or Everybody is invited. to central news agencies. 'Tis Funny. MR. EDITOR: 'Tis funny to a backwoodsman to read the paper s and observe what the big men say. 'Tis regular side-splitting to notice since the last general election how many reasons have been given for the defeat of the Democratic party. Col. William J. Bryan and the famous Col. Benjamin there could not be a fair and impartial Ryan Tillman have explained and explained until the whole matter is as opening either through Congress or the clear as mud. There is an oases in most deserts, and speaking of roads inclines us upon the refreshing padded pathway between Portman and old Pendleton. We like to think of such a luxury awaiting us some day from all points of our compass at l'ortman to the circumference of Anderson County. The road to old Pendleton recalls to us our editor's recent remark on roads; that the people of the South know how to build good roads without the North coming so far from home to teach them-if only the South would so keep the roads when constructed. In places the Pendleton road is beautiful; three to four vehicles may drive abreast. The road is smooth, assuming a conscious importance that it might be a suburban highway. Our thoughts lead to prosperity, good people, respectability and-yes,

the approach to somewhere-Pendleton. On the way no surprise is felt on findng a good road; the old aristocratic houses are there of the old families of Anderson County. What road commission would consider waste of time and money on roads bordered by the unfortunate architecture now bordering most of roads in Anderson and adjoining Counties? Who would expect people who could live in such huts to have nerves superior to the delicacy of the horse's body? If they can live in such huts, and if their animals can travel and not die over such roads, what's the need of expensive improvement? Such would seem to be the reasoning inference of the County Com-

Here is a vocation for the State: The money expended on whiskey politics, and whiskey education, place it in enforced refinement for the poor. Command it obligatory on the person building a house he shall build according to State contract of taste and comfort-if the person's means cannot afford this the State should supply means, then compel the person to keep in repair the house and its surroundings. This money in such a reform would do more for the poor and their children than shall ever be achieved by the State or city dispensary.
